Profile

I'm Yash Patel, currently pursuing a Bachelor of Engineering in Information Technology. Aspire to learn new things and technology and try to make constructive things helpful in the community.

Education

Gandhinagar Institute Of Technology, Bachelor of Engineering(IT) 2021 – present
Gandhinagar, India

R.C Technical Institute, Diploma In Engineering(IT) 2018 – 2021
Ahmedabad, India

Projects

CityRoute, PHP, JAVASCRIPT, MYSQL

The website is designed to make it **easy** for users to **navigate** the **public** transportation system. In which user can find the nearest BRTS station from their **current location** and show routes to reach their destination. In addition, it also gives information about the BRTS buses that take them to their destination. And implemented **Google MAP API** to **track** user's location so that helps them to navigate where they are and how long will it take to reach there and count of Bus stations.

Fighting Fun Game, Goku vs Vegeta On SCRATCH

I have created this game just to learn. It is just a two-player fight game in one device so that 2 users can use the same device and have fun. I have used the "**Scratch**" platform to build it.

Skills

Programming Language

PHP, C++, Web (CSS3, HTML5, Javascript)

Framework

Bootstrap

Databases

MySQL

Operating System

Windows, Linux

API

Google MAP API, MPDF, PHP
SpreadSheet.

Languages

ENGLISH • GUJARATI • HINDI

Interests

Tech Enthusiasm

Willing to adapt and ready to contribute with a new perspective

Application Development
